

CORPORATE PROFILE

DEVMET (Development Metrics)
<http://www.devmet.com>

THE COMPANY:

DEV MET is an outsource software development company, with expertise in developing custom software applications to meet customers' needs. We employ the best skills and knowledge to supply our clients with the state-of-the-art technology solutions.

Our Internet and Custom Application Development extends to Internet Business / Corporate System Development, Database Application Development, Client / Server Application Development, Windows Application Development etc.

MISSION

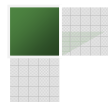

DEV MET's aim is to become customer's first choice. To achieve this aim, our mission is to improve productivity and profitability, by creating and providing software development and maintenance solutions to its customers. Ensuring its customers with the quality standard and timely service of software solutions in specialized fields but not limited to VoIP, Web Applications, Distributed Applications and Support Services.

GOALS

- Focusing on introducing more software products
- Promote our products with innovative software solutions
- Focusing on value addition of our products in order to retain their customers
- To improve the image of our nation as a whole by projecting a business friendly environment

DEV MET CORE VALUES

- Quality Service and Assurance
- Confidentiality
- Excellence
- Customer Orientation
- Timely Deliver
- Cost Effective

CLIENTELE:

It is DEVMET success to get clients from all over the world and deliver them quality work in-time. As a result of their 100% project completion the following are the few testimonials of our clients:-

🍀 Amazing work, amazing skills. I hired DEVMET on 4/10 and have a fully functional and complete SSL site done and ready to go in less than 30 days!!! This is truly a great accomplishment. Fun to work with, easy to get updates, and very affordable. Am already using this vendor for another project!! Would recommend to anyone and everyone for website design.

Ratings: Quality 5/5 | Expertise 5/5 | Cost 5/5 | Schedule 5/5 | Response 5/5 | Professionalism 5/5

Taylor Grant
United States of America.

🍀 I have not had a website built using Elance before and took a chance on Devmet as they are fairly new to Elance, but I liked their tone of communications, the few reviews they had were positive and their bid was competitive.

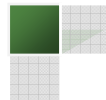

The experience was everything I could have wished for, Devmet were very professional, very responsive, easily capable of doing what I wanted done on the website, and patient with my almost constant requests for very minor changes... I thoroughly enjoyed working with them.

Ratings: Quality 5/5 | Expertise 5/5 | Cost 5/5 | Schedule 5/5 | Response 5/5 | Professionalism 5/5

🍀 DEVMET provided us with an affiliate program for our website and provided a first class service; all our requirements were met to a very high standard.

Many thanks for your work on this project and hopefully we can work together again in the future.

Jonathan Greenfield
Warlingham, Surrey,
United Kingdom.

Was not quite sure what I was going to get from dealing from a company from overseas but was I wrong, dealing with this company was an absolute treat. Communication was done on Skype so I was able to talk to there project manager who over seen my project from start to finish.

Also another great thing I found was that I was able to see from my computer there actual computer screen live and interactive, This allowed me to show them what I needed done which was a big plus as this was lacking from other coders I have used here.

Life has been made 10 times easier Using there knowledge of communication and interactivity.

I will not use another coder again these guys are the complete solution..

The best company I have worked with to date on Rent a Coder absolutely willing to do work and even modified a lot of code for me without any hassle.

Would recommend to anyone, very honest and hard working.

Faella

Enfield, London.

SKILLS & SERVICES:

In this era of rapidly changing technology DEV MET has kept the same pace of accepting new technologies and languages. Our highly competitive Software Engineers and Project Managers are always equipped with high-end technologies. Below are the main technologies we are working on:-

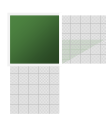

EXPERTISE

CUSTOMIZATION

Disclaimer: All above logos/trademarks are properties of their respective owners. DEV MET **does not** claim any authority over them.

DEVELOPMENT METHODOLOGY:

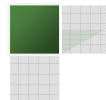

Once the project is officially accepted, we shall be assigning the same to a dedicated team of engineers comprising of a project manager who shall get in touch with you for a detailed reporting of each days work at least once every 24 hours. During the initial project phase, the entire project shall be reviewed very thoroughly with the co-ordination of all team members keeping into account all pros and cons and a basic flowchart of the entire project shall be prepared. After conceptualization, various project goals shall be planned like module development, database design, execution time frame, usability testing etc. The project manager would then distribute the various modules among his team members and review their work on daily basis with regular co-ordination of the client using our online project management system/IM/Phone etc.

We will be sending you **Weekly Reports** on every Friday for your ongoing project status and you would be able to check your project status live at our server(s).

Finally, the entire module sections shall be handed over to the quality control (QC/QA) department for quality/usability testing, performance output, coding conventions etc. to ensure delivery of 100% robust and bug free application.

In brief, we shall enable the development of the entire project with the following milestones as phase interval.

- Conceptualization of the entire project.
- Development of Site Maps and DFD's.
- Design and Development of entire Database Structure.
- Division of modules amongst all team members working on your project.
- Module wise development of the entire project.
- Integration of front-end modules and backend database.
- Testing of the entire site on the server environments.
- Specialized quality control (QC/QA) for entire project to ensure 100% reliability.
- Final Project delivery.

QUALITY POLICY & ASSURANCE:

Our primary responsibility is to deliver maximum value to our customers worldwide. In pursuance of this effort, with our dedicated teamwork, we commit ourselves to take the leadership both in development and technology of e-commerce solutions. To adhere in letter and spirit to the technical requirements and laid down systems which is essential for our products to be consistently the first choice of our customers through inbuilt quality and on-schedule delivery.

DEV MET has a comprehensive Quality Management System (QMS), which covers all areas of the third party software maintenance process. All project management plans, quality plans, configuration management plans and other operational processes will be followed as per QMS. DEV MET shall also ensure that all requirements of client, as per their quality standards, are followed during the entire project development cycle.
